Jiaxu Liu

Undergraduate Researcher | Wenzhou-Kean University
liujiax@kean.edu | xuliu9160-ops.github.io
GitHub: xuliu9160-ops

EDUCATION

Wenzhou-Kean University September 2024-2028 (expected)
Bachelor of Arts in Mathematical Sciences: Data Analytics Option

GPA: 3.855

RESEARCH INTERESTS

Continual Learning · Deep Learning · AI for Healthcare

ACCEPTED PUBLICATIONS

Adaptive Context-Guided Segment Aggregation with Low-Drop Consistency for Breast Ultrasound Video Classification

Jiaxu Liu, Yitian Ni, Meng Xu, Kuan Huang

BIBM 2026 (Accepted). Paper | Code

Context-guided segment aggregation and low-drop consistency for breast ultrasound video classification.

MANUSCRIPTS

Selecting Updates for a Unified Radiograph and CT Model: Retention and External Consequences

Jiaxu Liu, Meng Xu, Guanchao Tong, Kuan Huang

Completed manuscript; preparing for submission.

History Tells Where, Not What: Minimal Revision of Deployed Classifiers When Diagnostic Definitions Change

Jiaxu Liu, Yitian Ni, Meng Xu, Kuan Huang

Completed manuscript; preparing for submission.

RESEARCH EXPERIENCE

Undergraduate Research Assistant February 2026-Present
Kean University | AI4Healthcare Lab
Advisor: Prof. Kuan Huang

- Conduct research on medical image and video analysis, including breast ultrasound video classification and adaptation of medical imaging models.
- Research outputs include a first-author paper accepted at BIBM 2026 and two completed manuscripts being prepared for submission.

Visiting Student May 25-August 25, 2026
Westlake University | Research group of Prof. Lin Yang
Mentor: Yu Bai

- Investigated ordinal modeling for enzyme turnover rate (kcat) prediction, including discretization of continuous log-scale targets into ordered intervals.
- Explored training objectives for enzyme activity prediction across orders of magnitude; conducted simulation experiments, model comparisons, and analysis of activity levels and their ordering.
- Curated whole-slide pathology datasets by matching SVS/SDPC slides with annotations, checking readability, extracting patches, and generating labels for downstream segmentation.
- Organized cell detection results, generated heatmaps, and compiled statistical summaries and regional area measurements to support dataset preparation and project delivery.

Research Intern (Remote) August-November 2025
Southeast University
Supervisor: Wenjun Ke

- Undertook introductory study of large language models and chain-of-thought reasoning under supervision.

HONORS AND AWARDS

Dean’s Scholarship, Second Class Academic Year 2025-2026
Wenzhou-Kean University
